Brokerage Products: Not FDIC Insured • No Bank Guarantee • May Lose Value

In the bond market there is no centralized exchange or quotation service for most fixed income securities. Prices in the secondary market generally reflect activity by market participants or dealers linked to various trading systems. Bonds available through Schwab may be available through other dealers at superior or inferior prices compared to those available at Schwab. While the quoted price generally represents the best price available to Schwab at the time of order entry, better prices may be obtained by calling Schwab or otherwise placing a bid/offer request.

The securities listed herein are subject to availability. All prices are subject to change without prior notice.

Tax-exempt bonds are not necessarily a suitable investment for all persons. Information related to an issue's tax-exempt status (federal and in-state) is obtained from third-parties and Schwab does not guarantee its accuracy. Tax-exempt income may be subject to the Alternative Minimum Tax (AMT) and capital gain taxes. Consult a tax advisor regarding your particular tax situation.

Certificates of Deposit available through Schwab CD OneSource typically offer a fixed rate of return, although some offer variable rates. They are FDIC insured, offered through Charles Schwab & Co., Inc. and in most cases subject to an early withdrawal penalty.

The information is obtained from sources believed to be reliable; however, its accuracy or completeness is not guaranteed. Charles Schwab & Co., Inc. and its affiliates, employees, and/or directors may hold positions and/or transact with customers (as principal or agent) in the securities shown herein.
