2019 MARKET OUTLOOK

Sailing in Uncharted Waters

presented by:

Dennis Stearns, CFP®
President, Stearns Financial Group
Dennis Stearns, CFP®

- Dennis Stearns is a **financial planning practitioner and President of Stearns Financial Group** (SFG), a fee-only financial planning and investment management firm with offices in Chapel Hill and Greensboro and clients around the U.S. and overseas.

- Dennis has been called “one of the leading scenario experts and futurists in the financial planning industry” by the Financial Planning Association. He has been named Triad Entrepreneur of the Year (2008) and SFG has been included as a multi-year Inc. 5000 list member. Dennis was among those chosen as **“Most Admired CEOs”** by the Triad Business Journal in 2016.

- He is a **TEDx speaker on The Changing Future of Jobs**.

- Dennis is **Treasurer and a board member of Gateway University Research Park**, home of the JSNN nano-center.

- He is a **partner in a Technology Business Accelerator** and is an advisory board member for the **Greensboro Chamber’s “Launch” Entrepreneur program**.

- Dennis is a former **chess expert** and was a **member of one of the winningest Pan American Chess Teams in U.S. history**. He coaches an inner city chess club and often plays up to 35 people at the same time to raise money for children’s charities.
Agenda

1. Why Uncharted Waters?
2. U.S. and World economic health
3. Diversification Woes in 2018
4. Investing Strategies
5. Financial Planning Strategies
6. Q&A
Volatility
Uncertainty
Complexity
Ambiguity
Why Uncharted Waters?

1. Rising interest rates after a decade of ultra-low rates
2. Rise of protectionism plays havoc with global supply chains
3. New geo-political threats, including China
4. Massive disruption and dislocation creates unprecedented opportunities and threats
5. Social media and 24/7 news magnifies fear center of our brain
U.S. Economy Cooling

Our Economic Momentum Indicator shows momentum continued to cool in Q4 as our preferred hard data real GDP growth proxy slipped to around 2.4% in November. The soft data indicator remains high, but also softened in the month. We see real GDP growth easing to around 2.7% in Q4.

Global Manufacturing Trends

Global Purchasing Managers’ Index for manufacturing, quarterly

Source: Markit, J.P. Morgan Asset Management.

Heatmap colors are based on PMI relative to the 50 level, which indicates acceleration or deceleration of the sector, for the time period shown. Heat map is based on quarterly averages, with the exception of the two most recent figures, which are single month readings. Data for Canada, Indonesia and Mexico are back-tested and filled in from December 2007 to November 2010 for Canada and May 2011 for Indonesia and Mexico due to lack of existing PMI figures for these countries. DM and EM represent developed markets and emerging markets, respectively. Guide to the Markets – U.S. Data are as of December 31, 2018.

Recession Watch

Recession watch
BlackRock estimate of forward-looking U.S. recession probability, 1986-2021

U.S. recession risk is on the rise

Actual recessions

Risk of recession by
2019 19%
2020 38%
2021 54%

Recession probability

Sources (Top Chart): BlackRock Investment Institute, with data from Thomson Reuters, November 2018. Notes: The chart shows the estimated four-quarter-ahead probability of a U.S. recession. Actual U.S. recessions as defined by the U.S. National Bureau of Economic Research are denoted by the shaded areas. The estimation is done via a series of quantile regressions that estimate the probability that growth will be below a certain threshold. The 2019 and 2020 probabilities (shaded blue) are based on a range of likely outcomes of financial conditions, financial vulnerabilities and growth. The inset chart shows the cumulative probability of being in a recession by the end of each noted year. Forward-looking estimates may not come to pass.

Source: www.aaii.com; The AAII Investor Sentiment Survey has become a widely followed measure of the mood of individual investors. The weekly survey results are published in financial publications including Barron's and Bloomberg and are widely followed by market strategists, investment newsletter writers and other financial professionals.
Global Stock Market Returns 2017 vs. 2018

Source: FactSet, MSCI, Standard & Poor’s, J.P. Morgan Asset Management.

All return values are MSCI Gross Index (official) data, except the U.S., which is the S&P 500. *Multiple expansion is based on the forward P/E ratio and EPS growth outlook is based on NTMA earnings estimates. Chart is for illustrative purposes only. Past performance is not indicative of future results.

The volatility of the indexes could be materially different from that of a client’s portfolio. Indexes do not reflect fees and expenses and are not available for direct investment.

2019 Market Outlook: Sailing in Uncharted Waters
Expectations are Significantly Lower in 2019

SFG cannot guarantee projections or that estimates will actually be met. Please see our disclosures at the end of this document.
S&P 500 Annual Returns and Intra-year Declines

S&P 500 intra-year declines vs. calendar year returns

Despite average intra-year drops of 13.9%, annual returns positive in 29 of 39 years

Source: FactSet, Standard & Poor’s, J.P. Morgan Asset Management.

Returns are based on price index only and do not include dividends. Intra-year drops refers to the largest market drops from a peak to a trough during the year. For illustrative purposes only. Returns shown are calendar year returns from 1980 to 2018, over which time period the average annual return was 8.4%. Guide to the Markets – U.S. Data are as of December 31, 2018. Past performance is not indicative of future results. There are no assurances that movements or trends can or will be duplicated in the future. The volatility of the indexes could be materially different from that of a client’s portfolio. Indexes do not reflect fees and expenses and are not available for direct investment.
Households’ Stock Allocation Near-Record

Source: Charles Schwab, Factset, Ned Davis Research (NDR), Inc. (Further distribution prohibited without prior permission. Copyright 2018 (c) Ned Davis Research, Inc. All rights reserved.), as of September 30, 2018. Equity allocation (includes mutual funds and pension funds) is % of total equites, bonds and cash.

Past performance is not indicative of future results. There are no assurances that movements or trends can or will be duplicated in the future. The volatility of the indexes could be materially different from that of a client’s portfolio. Indexes do not reflect fees and expenses and are not available for direct investment.
According to Goldman Sachs, its Bull/Bear indicator at 73% marks the highest reading since the late 1960s and early 1970s and indicates that a period of lower U.S. stock returns should be anticipated.

SFG cannot guarantee projections or that estimates will actually be met. Please see our disclosures at the end of this document.

*P/CF is a 20-year average due to cash flow data availability. Guide to the Markets – U.S. Data are as of December 31, 2018.

Source: FactSet, FRB, Robert Shiller, Standard & Poor’s, Thomson Reuters, J.P. Morgan Asset Management. Price to earnings is price divided by consensus analyst estimates of earnings per share for the next 12 months as provided by IBES since December 1993, and FactSet for December 31, 2018. Average P/E and standard deviations are calculated using 25 years of IBES history. Shiller’s P/E uses trailing 10-years of inflation-adjusted earnings as reported by companies. Dividend yield is calculated as the next 12-month consensus dividend divided by most recent price. Price to book ratio is the price divided by book value per share. Price to cash flow is price divided by NTM cash flow. EY minus Baa yield is the forward earnings yield (consensus analyst estimates of EPS over the next 12 months divided by price) minus the Moody’s Baa seasoned corporate bond yield. Std. dev. over-/under-valued is calculated using the average and standard deviation over 25 years for each measure.
Large Cap U.S. Stocks

REAL TOTAL RETURN INDEX

Source: RiverFront Investment Group, calculated based on data from CRSP 1925 US Indices Database ©2016Center for Research in Security Prices (CRSP®), Booth School of Business, The University of Chicago. Data from Jan 1926 through November 2018. Past performance is no guarantee of future results. Technical analysis is based on the study of historical price movements and past trend patterns. There are no assurances that movements or trends can or will be duplicated in the future. It is not possible to invest directly in an index. RiverFront’s Price Matters® discipline compares inflation-adjusted current prices relative to their long-term trend to help identify extremes in valuation. Blue line represents the Large Cap Real Return Index. Yellow line represents the Annualized Real Trend Line of Large Cap Real Total Return Index according to Price Matters®. Shown for illustrative purposes only, not indicative of RiverFront portfolio performance. Information or data shown or used in this material was received from sources believed to be reliable, but accuracy is not guaranteed.
Global Equity Earnings and Valuations

Source: FactSet, MSCI, Standard & Poor's, Thomson Reuters, J.P. Morgan Asset Management.

*Valuations refer to NTMA P/E for Europe, U.S., Japan and developed markets and P/B for emerging markets. Valuation and earnings charts use MSCI indices for all regions/countries, except for the U.S., which is the S&P 500. All indices use IBES aggregate earnings estimates, which may differ from earnings estimates used elsewhere in the book. MSCI Europe includes the eurozone as well as countries not in the currency bloc, such as Norway, Sweden, Switzerland and the UK (which collectively make up 47% of the overall index). Past performance is not a reliable indicator of current and future results. Guide to the Markets – U.S. Data are as of December 31, 2018.
Performance of U.S. vs. International Stocks

Source: MSCI, FactSet, J.P. Morgan Asset Management.
*Cycles of outperformance include a qualitative component to determine turning points in leadership. Guide to the Markets – U.S. Data are as of December 31, 2018.
Past performance is not indicative of future results. There are no assurances that movements or trends can or will be duplicated in the future. The volatility of the indexes could be materially different from that of a client’s portfolio. Indexes do not reflect fees and expenses and are not available for direct investment.
MSCI EAFE (in U.S. dollars)

Source: RiverFront Investment Group, Factset. Data from Jan 1970 through November 2018. Past performance is no guarantee of future results. It is not possible to invest directly in an index. RiverFront’s Price Matters® discipline compares inflation-adjusted current prices relative to their long-term trend to help identify extremes in valuation. ## Global Equity Markets

| Trade war fears remain a headwind until a substantive agreement is made. International stocks continue late 2018 outperformance with a boost from a weakening US dollar. | Negative earnings growth in some sectors and negative global growth pressure equity markets. Corporate debt yields widen substantially leading to an increasing number of downgrades and defaults. | With trade fears averted, Emerging market stocks outperform. Softening of global economic data displayed at the end of 2018 turns out to be temporary. |
| S&P 500 ends the year at 2,655 representing an approximate 7.9% total return. | S&P 500 ends the year at 2,160 representing an approximate -12% total return. | S&P 500 ends the year at 2,935, representing an approximate 18.5% total return. |

## Unemployment (U3)

| 3.70% | 4.40% | 3.30% |

## Oil (WTI)

| $60 | $40 | $70 |

## Inflation (Core CPI)

| 2.20% | 1.50% | 2.80% |

Our Take

• U.S. economic growth cools but remains reasonable

• International economic growth also cooling, but majority of the world still growing

• Fear has cooled investors’ “animal spirits”

• Geo-political “bad seeds” risks are bubbling, although near-term risk is modest

• Risk vs. Reward balance is modestly positive
Our Take

• Exponential technologies on sale
• Emerging markets on sale
• International mid/small cap on sale
• International blue chips have outsized return potential with lower risk than most other AG areas
• Semi-liquid and Illiquid alternatives often mispriced
Our Take

• Rising risks on the horizon suggest caution
• Expect more modest three- to five-year returns
• Money markets look more attractive
• Bonds – shorten duration, increase quality overall
• U.S. stocks – focus on quality, rebalance value and growth
• International stocks – focus on quality
• Carefully consider pros and cons of alternatives
Our Take

• Exercise caution when considering annuity products

• Beware behavioral financial traps

• Ignore what’s “normal” for your age and stage – what is your “sleep well” vs. “eat well” balance?
Financial Planning Strategies for Uncharted Waters

1. Got a plan?

2. Second mate fully briefed and ready?

3. Safety net (fuel reserves) – back to two years of living expenses in cash (scaled to risk level)

4. Mitigate the risks as you age – depression, behavioral finance, brain chemistry changes, other fourth quarter fumbles
Index Definitions

All indexes are unmanaged and an individual cannot invest directly in an index. Index returns do not include fees or expenses. The volatility of the indexes could be materially different from that of a client’s portfolio.

Equities:
The MSCI EAFE Index (Europe, Australasia, Far East) is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the U.S. and Canada.

The MSCI Emerging Markets Index is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global emerging markets.

The Russell 2000 Index® measures the performance of the 2,000 smallest companies in the Russell 3000 Index.

The S&P 500 Index is widely regarded as the best single gauge of the U.S. equities market. The index includes a representative sample of 500 leading companies in leading industries of the U.S. economy. The S&P 500 Index focuses on the large-cap segment of the market; however, since it includes a significant portion of the total value of the market, it also represents the market.

Fixed income:
The Bloomberg Barclays 1-3 Month U.S. Treasury Bill Index includes all publicly issued zero-coupon U.S. Treasury Bills that have a remaining maturity of less than three months and more than one month, are rated investment grade, and have $250 million or more of outstanding face value. In addition, the securities must be denominated in U.S. dollars and must be fixed rate and non-convertible.

The Bloomberg Barclays U.S. Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS and CMBS (agency and nonagency). The index has an average maturity generally in the intermediate-term range (5-7 years). Provided the necessary inclusion rules are met, US Aggregate-eligible securities also contribute to the multicurrency Global Aggregate Index and the U.S. Universal Index, which includes high yield and emerging markets debt. The U.S. Aggregate Index was created in 1986 with history backfilled to January 1, 1976.

The Bloomberg Barclays Global High Yield Index is a multi-currency flagship measure of the global high yield debt market. The index represents the union of the U.S. High Yield, the Pan-European High Yield, and Emerging Markets (EM) Hard Currency High Yield Indices. The high yield and emerging markets subcomponents are mutually exclusive. Until January 1, 2011, the index also included CMBS high yield securities.

Other asset classes:
The Bloomberg Commodity Index and related sub-indices are composed of futures contracts on physical commodities and represents 22 separate commodities traded on U.S. exchanges, with the exception of aluminum, nickel, and zinc.

The NAREIT EQUITY REIT Index is designed to provide the most comprehensive assessment of overall industry performance, and includes all tax-qualified real estate investment trusts (REITs) that are listed on the NYSE, the American Stock Exchange or the NASDAQ National Market List.
Questions?

Past performance is no guarantee of future results. This material is not financial advice or an offer to sell any product. This report is for informational purposes only. The Triad Business Journal’s (TBJ’s) 2016 Most Admired CEOs is not indicative of future performance. The TBJ Most Admired CEOs honors the Triad’s outstanding business leaders. The honorees are selected among local CEOs and company presidents at both nonprofit and for-profit organizations, including both public and private companies. Nominees do not necessarily have to carry the title CEO, but they must be the top executive for their organizations. Honorees are chosen by TBJ designated judges from a pool of online nominations. Those chosen for the honor will have demonstrated vital leadership and a customer service philosophy, outstanding employee relationships, contributions to the community and evidence that they have shaped their company’s products or services to help lead their business to success.

The Inc. 5000 is an annual ranking of America’s fastest-growing private companies based on percentage revenue growth over a three-year period.

Certified Financial Planners™ (CFP®) are licensed by the CFP® Board to use the CFP® mark. CFP® certification requirements include: Bachelor’s degree from an accredited college or university, completion of the financial planning education requirements set by the CFP® Board (www.cfp.net), successful completion of the CFP® Certification Exam, comprised of two 3-hour sessions, experience requirement: 6,000 hours of professional experience related to the financial planning process, or 4,000 hours of Apprenticeship experience that meets additional requirements, successfully pass the Candidate Fitness Standards and background check, agree annually to be bound by CFP® Board’s Standards of Professional Conduct, and complete 30 hours of continuing education every two years, including two hours on the Code of Ethics and Standards of Professional Conduct.
